

Limassol, March 24, 2014.

Dear Sirs,

Our mv Mar IMO # 9586447 will arrive in the North American Emission Control Area on March 28, 2014 and is currently on the way to the port of Gloucester NJ.

Vessel is burning non-compliant fuel with a sulphur content higher than 1 %.

Vessel has been nominated on March 06, 2014 to load a cargo out of Tuxpan/Mexico for discharge in Gloucester NJ. Vessel does not have low sulfur fuel on board to perform this voyage. We have attempted to purchase additional compliant low sulfur fuel but in Barcadera/Aruba, Kingston/Jamaica and Tuxpan/Mexico no low sulfur fuels were available.

Kindly find attached:

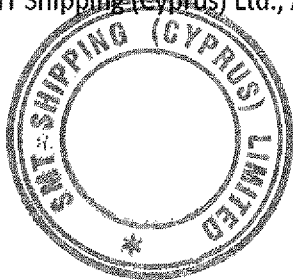

1. Completed ECA0100 FONAR form
2. Confirmation email that two (2) fuel suppliers in Charleston are currently without 1.0% sulfur IFO including contact information.

I certify under penalty of law that the statements and information made herein are, to be best of my knowledge and belief, true and complete. I am aware that there are significant penalties for knowingly submitting false statements and information, including the possibility of fines and imprisonment to 18 U.S.C. § 1001.

For and on behalf of SMT Shipping (Cyprus) Ltd., As agents only

Mark Rensen

Operations Manager

Subject: RE: TUXPAN

Good morning Patrick,

This email confirms that, due to the inherently high sulphur content of Petroleos Mexicanos (Pemex) heavy residual fuel, there is no Low Sulphur intermediate fuel availability at the port of Tuxpan, or any other port in Mexico.

Kind regards

Subject: FW: ARUBA

Peter / Patrick

Please see below reply from Curoil.

FYI, the port of Barcadera is currently under construction and Curoil would have not been able to supply. Also they have a minimum of 350 mts to bring their tanker from Curacao to Aruba.

Best regards,

Patrick Lehmann
